

## RUSSELL M. JAFFE, MD, PH.D., CCN

Russell Jaffe has had the privilege of contributing to the “birth” of modern integrative medicine. He works from first principles of biology to clarify the causal mechanisms of good health and ill health. His over 100 articles and invited reviews attest to his professional contributions.

The practical contributions to clinical medicine and to healthcare policy presented here provide you an introduction to him and his work. Functional, predictive tests and procedures designed to improve the precision of both diagnosis and of treatment outcomes are his focus. Cause (fundamental source of the problem) is more interesting than consequence (symptoms) when the goal is high-level function and well-being. Examples of his contributions to molecular biology and clinical diagnostics include:

**1. Early colon cancer detection test:** Tests a tiny speck of stool for traces of blood (occult blood). Previous occult blood tests were inhibited by ascorbate. After documenting how much inhibition ascorbate causes, he validated a novel procedure suitable for either stool or urine that is not inhibited by ascorbate (vitamin C).

A. Jaffe R et.al. Ascorbic Acid (vitamin C) Inhibits Occult Blood Detection in Stool, AFCC, Atlantic City, *Clinical Research* 22:453, 1973.

B. \_\_, Kasten B, MacLowry J, Young D. False Negative Occult Blood Tests Caused by Ascorbic Acid. *Ann Int Med* 1975;83:824-826.

C. \_\_, Zierdt W. An Occult Blood Test Procedure not Subject to Inhibition by Reducing Substances. *J Lab Clin Med* 1975;93:879-886.

D. \_\_, Lawrence L, Schmid A, MacLowry J. Inhibition by Ascorbic Acid (vitamin C) of Chemical Detection in Urine. *American Journal of Clinical Pathology* 1979; 42:468-470.

**2. Predictive tests of cardiovascular health and function based on changes in blood clotting and systemic repair status:**

- Dose-response platelet aggregation assays.
- Fibrinogen survival assay using fully active fibrinogen.
- Platelet survival assay using fully active platelets.

A. Jaffe R. Platelet Interaction with Connective Tissue. In *Physiological Reaction of Blood Platelets* (Gordon, Ed.). *Elsevier* 1976, 261-292.

B. Pitas R, Nelson, C, Jaffe R, Mahley R. 15,18-Tetracosadienoic Acid Content of Sphingolipids from Platelets and Erythrocytes of Animals Fed Diets High in Saturated or Polyunsaturated Fats. *Lipids* 1978; 13:551-556.

C. Pitas RE, Nelson GJ, Jaffe RM, Mahley RW. The Effect of Cholesterol Supplementation on the Composition of Phospholipids from Platelets and Erythrocytes of Dogs Fed Diets High in Tallow or Cottonseed Oil. *American Oil Chemists Society* St. Louis, Missouri, May, 1978.

D. \_\_, Oxidized Cholesterol and Atherosclerosis. *Common Knowledge* 1980; 4 (Winter): 67-72.

**3. Molecular biology discoveries:**

- Quantification of the number of concurrent platelet binding sites needed for collagen to activate platelet-induced blood clotting.
- Identification of the mechanism that controls collagen activation of platelets.

A. Jaffe R, Deykin D. Aggregation of Platelets by Purified Collagens, FASEB, Atlantic City, N.J., *Fed Proc* 31:243, 1972.

B. \_\_, Deykin D. Evidence for the Structural Requirement for the Aggregation of Platelets by Collagen. *J Clin Invest* 1974;53:875-883.

E. \_\_, Binding of Different Collagens to Human Platelets. Proc. 5th Congress International Society for Thrombosis and Haemostasis, *Thromb Diath Haemorrh* 34:332, 1976.

F. \_\_, Role of Quaternary Structure in Collagen Binding to and Aggregation of Platelets, (with Daniel Deykin), *Texas Rep. Biol Med* 1975;33(4):586.

G. \_\_, Deykin, D. Proceedings: Bindings of Collagen to Platelets. *Thromb Diath Haemorrh* 1975;34(1):330-332.

H. Jaffe, R. Platelet Interaction with Connective Tissue. In *Physiological Reaction of Blood Platelets* (J Gordon, Ed.) *Elsevier* 1976, 261-292.

**4. Antigen ultra-purification for use in high sensitivity immunology assays:** Purer antigens mean more precise test results. A novel volatile buffer is used. The buffer evaporates as the antigen dries on the surface of the reaction chamber (microtiter plate). This allows for uniquely effective, more specific challenges from which to determine hypersensitivity in LRA by ELISA/ACT functional cell response assays.

**5. Mechanism of connective tissue cross-link inhibition by d-penicillamine.**

A. Franzblau, C. Faris B. Salcedo, L. Jaffe, R. and Crombie, G. *Chemistry and Biosynthesis of Cross-links in Elastin*. In *Chemistry and Molecular Biology of the Extracellular Matrix* (Balazas, Ed.) Academic Press, 1970, p 617-641.

B. Jaffe R. *Mechanism of Cross-Linkage Inhibition by Penicillamine*, in *Texas Reports on Biology and Medicine*, Spring, 1971. [Merck, Sharp, & Dohme Excellence in Research Award given for this work].

## 6. Predictive tests of immune function and hypersensitivity / delayed allergy:

A proprietary, comprehensive, autologous, *ex vivo* lymphocyte response assay (LRA by ELISA/ACT<sup>®</sup>) cell culture that tests concurrently all 3 types of delayed immune responses (based on Gel and Coombs' categories of immune response) in reaction to antigens recognized as helpful (tolerant, non-reactive) or harmful (hypersensitive, reactive).

**7. Predictive tests of nutritional / metabolic function:** Nutritional and toxic mineral provocation test protocols using d-penicillamine to assess cellular mineral and buffering capacity through a safer, non-invasive technique. Separately, Dr. Jaffe has received numerous patents for this discoveries in nutritional science. These advances are incorporated into the PERQUE line of professionally dispensed dietary supplements. PERQUE unique features include scientific and clinical leadership, full disclosure labels, proven full bioavailability, proven full function formulas, and clinically validated full health promotion.

Honored as an International Scientist of 2003 by the IBC, Oxford, England, UK for his lifetime contributions to clinical medicine, biochemistry, immunology, methodology, and integrative health policy, Dr. Jaffe is appreciative of the recognition of his peers. He currently serves on the American Board of Clinical Metal Toxicology and coordinates its certification training program. America's Top Physicians 2005, Who's Who in America; Who's Who in Medicine and Science; Who's Who in Business and Engineering all have included him in recognition of his contributions to science and community.
